# eDairy Major release 2025

## Harmonization

Change ID	Name	Type	Spec	Release
24.1	Remove timestamp from API requests.	Major	Remove timestamp from API requests. In release v1.1.0, "modified since" requires a dateTime stamp.	Included, also modified since.
24.2	Difference in invoice data.	Minor	Invoice date with or without timestamp. Proposed change: make all dateTime data elements that occur in the invoice a date type (without the time stamp).	Harmonize: Invoice, only date. Removing timestamp.
24.3	Differences Qlip versus RFC json messages	Major	Delivery.milkTemperature Qlip: unitCode change in unitOfMeasure invoiceLine.vatPercentage RFC: change string-type in double-type.	Harmonize: Qlip will copy FrieslandCampina format.
24.4	ModifiedSince	Major	Support ModifiedSince by Qlip. *1, if feasible to realize in time. Else modified since	Delivery & quality -> modified since. Invoice -> webhook *1
24.5	Kvk-ubn	Major	Support kvk-ubn by RFC.	Harmonize: UBN requests only
24.6	Fat, protein, lactose, ureum in json delivery and invoice?	Major	RFC includes fat, protein, lactose, ureum in the json delivery and invoice, Qlip does not. What to do in the future?	Harmonize: RFC, to remove delivery info out of invoice
24.7	Support foreign farm ids.	Major	Include other farm-id's, other then KvK. Such as: egnr (EG-number), be.onn (Belgian company id) en/of be.pen (Belgian production-unit-number).	In need for investigation, will not be included.
