eDairy APIs release notes

Author : AgroConnect, eDairy release notes 2024
Date : 17mrt25
Version : v2025p01

OVERVIEW PROPOSED CHANGES

These release notes refer to the eDairy REST Json API calls: delivery, quality and invoice.

status	description
Current version	v1.1.0. Release date: 11sep23. No new endpoint.
New version	v2.0.0. New endpoint.
Release date	To be determined

The new release concerns the following changes:

Change id	Issue reference	Issue name	Type	specification
24.1	Issue 83	Remove timestamp from API requests.	MAJOR	Remove timestamp from API requests. In release v1.1.0, "modified since" requires a dateTime stamp.
24.2	Issue 84	Difference in invoice data.	MINOR	Invoice date with or without timestamp. Proposed change: make all dateTime data elements that occur in the invoice a date type (without the time stamp).
24.3	Issue 90	Differences Qlip versus RFC json messages	MAJOR	Delivery.milkTemperature Qlip: unitCode change in unitOfMeasure invoiceLine.vatPercentage RFC: change string-type in double-type.
24.4	Gap-analysis Qlip-RFC	ModifiedSince	MAJOR	Support ModifiedSince by Qlip.
24.5	Gap-analysis Qlip-RFC	Kvk-ubn	MAJOR	Support kvk-ubn by RFC.
24.6	Gap-analysis Qlip-RFC	Fat, protein, lactose, ureum in json delivery and invoice?	MAJOR	RFC includes fat, protein, lactose, ureum in the json delivery and invoice, Qlip does not. What to do in the future?
24.7	Issue 96	Support foreign farm ids.	MAJOR	Include other farm-id's, other then KvK. Such as: egnr (EG-number), be.onn (Belgian company id) en/of be.pen (Belgian production-unit-number).
24.8	Issue 8 Issue 41 Issue 61	Implementing delInd in …delivery by Qlip.	MAJOR	DelInd is already fully implemented by RFC; Qlip will do so in this next release.
24.9	Issue 95	Analysis results extra samples.	MINOR	Also distribute the analysis results of extra samples.

See the next page for the timeline and milestones.

TIMELINE, MILESTONES

Release deadline (in production date, IPD) is: wk xx (the week of Monday xxxxxx).

step	milestone	timing	deadline	specification
